Jaw Crusher

Product Description:

Jaw crusher series have features of big crushing ratio, uniform products size, simple structure, reliable work, easy maintenance and low cost. It is widely used in stone mining, metallurgy industry, building material, highway, railway, water conservancy and chemical industries. Various material with compression resistance less than 320MPa can be crushed.

Advantages and characteristics :

Short toggle, low hanging, big swing angle, long useful life, easy maintenance, high reliability, etc.

Technical Parameters:

Model	Max. feed size(mm)	Capacity (t/h)	Discharge Size(mm)	Motor Power (kw)	Weight (t)	Overall Dimensions (mm)
PE-250×400	210	5-20	20-80	15	2.8	1450×1315×1296
PE-400×600	340	16-65	40-100	30	6.5	1565×1732×1586
PE-500×750	425	45-100	50-100	55	10.1	1890×1916×1870
PE-600×900	500	50-120	65-140	55/75	15.5	2305×1840×2260
PE-750×1060	630	52-180	80-160	110	28	2450×2472×2840
PE-900×1200	750	140-360	100-200	110	50	3335×3182×3025
PE-1000×1200	850	160-420	195-260	110	51	3335×3182×3025
PE-1200×1500	1020	400-800	150-350	180	100.9	4200×3732×3025
PEX-250×1000	210	16-52	25-60	30/37	6.5	1530×1992×1380
PEX-250×1200	210	20-60	25-60	37	7.7	1900×2192×1430
PEX-300×1300	250	20-90	20-90	55	11	1900×2192×1430

If there is change of the above specification, it subjects to the newest products' specifications.
